

# Your First Line of Defense Against Class A Fires

SparkBarrier is specially formulated to empower firefighters with a safer, more effective solution for Class A fires. Utilizing an advanced blend of eco-friendly surfactants, SparkBarrier enhances the firefighting capabilities of water by creating a dense foam blanket that envelops fuels, quickly extinguishing flames while protecting lives, property, and the environment.

## Vital Statistics

Meets the requirements of NFPA 1150

Outstanding effectiveness in Compressed Air Foam Systems (CAFS) and Nozzle Aspirated Foam Systems (NAFS)

Qualified for use by the USDA Forest Service

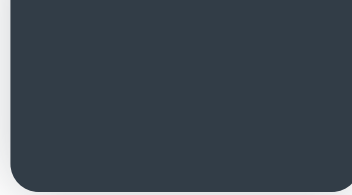

Highly effective at fighting Class A fires

Reduces the amount of water needed to extinguish a fire

Free from PFOS/PFOA fluorinated surfactants

## Qualifications

SparkBarrier is fully qualified for use by the USDA Forest Service under Specification 5100-307b for bucket and ground applications.

SparkBarrier contains no PFOS/PFOA fluorinated surfactants.

It is readily biodegradable and safe to use near open flames.

SparkBarrier meets the requirements of NFPA 1150 and performs exceptionally well in CAF and NAFS systems.

## Properties

Appearance.....	Pale Yellow Liquid
Density @ 77°F.....	8.55 lbs/USgal (1.027 kg/L)
Pour Point.....	21.2°F / -6°C
Viscosity @ 70°F.....	< 60 cP
pH (Undiluted).....	8.6 -9.6
Flash Point.....	> 212°F / 100°C
Packaging.....	Available in Totes, Drums, and Pails

## Use Rates

Wetting Agent.....	0.1%
Direct Attack.....	0.3%–0.5%
Exposure Protection.....	1.0%
Brush (Pre-Treat).....	0.7%–1.0%
